

Components of a Successful Condition Monitoring Program

Taken from *Audit it. Improve it: Getting The Most from Your Vibration Monitoring Program* by Alan Friedman

1. Right Goals

Having clearly defined and achievable goals that may evolve over time.

2. Right People

Having the right people in the right roles with the right training.

3. Right Leadership

Inspiring continuous improvement.

4. Right Tools

Having the right tools and technology to help reach the goal.

5. Right Understanding

Equipment audits, reliability and criticality audits, FMEA, etc.

6. Right Data Collection

Collecting the right data in time to detect defects or impending failures.

7. Right Analysis

Turning data into defect or fault diagnoses and actionable info.

8. Right Reporting

Getting info to the right people, at the right time, in the right format.

9. Right Follow-up and Review

Acting on reports, verifying results, benchmarking, auditing improvements, etc.

10. Right Processes and Procedures

Tying together people, technology, info, decision making, and review.
